See further in the dark.

Get round-the-clock protection with the C1HC. When there's insufficient light for you to see in the dark, the C1HC camera still sees what's there, up to 12 meters (40 feet) away. Two super-efficient infrared illuminators light up the camera's expansive field of view, so you see everything clearly in the live stream and in recorded footage.

Receive insightful notifications.

You deserve to know everything that's going on in your house while you're away. The C1HC records every motion faithfully – including those that happen in the dark. You'll receive instant notifications on your phone so you can get the details on all the goings-on at home.

Enjoy real-time conversation.

Use the EZVIZ App to call your family at home from wherever you are. Like an actual phone call, two sides can talk simultaneously—thanks to the advanced full-duplex audio feature on the C1HC.

Installation made easy.

Not interested in drilling a hole in your wall? No problem! We've made installation of the C1HC super easy. Just unwrap the package, plug in the cable, and mount the camera on a metallic surface or any other place using the mounting kit. Once you find the right viewing angle, you are all set!
