Brief Introduction

C9AP is a smart floodlight camera which can emit bright light and capture clear footage to protect your home and the yard. This floodlight camera has embedded dual LED lights (maximum 3000 Lumens of brightness) and a 3 megapixels digital camera with passive infrared sensors (PIR) mode to detect movements up to 12 meters away. This floodlight camera not only offers night vision function, but also supports a diagonal 110 ° field of view to capture the largest monitored area. C9AP can connect to Wi-Fi and supports both cloud storage and up to 256GB SD card local storage for live video recording. It is also compatible with ZSmart mobile APP that enables human detection alert, real-time status notification and video review. The two-way call audio allows users to talk interactively with the mobile APP through the camera.
